🔑 ahmedzaridi2001

Professional Summary

Final-year Computer Science and Networks engineering student (MIAGE option), passionate about full-stack development and DevOps. Experienced in building secure RESTful APIs, cloud integration, and data-driven applications. Strong interest in cloud computing and DevOps practices. Seeking a final-year internship in software development or DevOps to apply technical expertise and contribute to impactful projects.

Education

École Marocaine des Sciences de l'Ingénieur (EMSI)

State Engineering Degree – Computer Science & Networks, MIAGE option

Casablanca

2023 – Present

École Marocaine des Sciences de l'Ingénieur (EMSI)

Preparatory Class

Casablanca

2021 – 2023

University of Beni Mellal

Bachelor in Economics and Management

Beni Mellal

2020 – 2021

Professional Experience

LumiaTechnologie

Paris

Intern – Full-Stack Developer, CraftReportIA Project

Jul. 2025 – Sep. 2025

- Designed and developed CraftReportIA, an intelligent platform for automated structured report generation.
- Developed the front-end with Next.js (modern, responsive, and high-performance interface).
- Implemented a Docker-containerized microservices architecture with Spring Boot.
- Built secure RESTful APIs to efficiently handle report requests.
- Deployed a Python microservice containerized with Docker, integrating the LLaMA 3 model.
- Managed data with Elasticsearch for fast and efficient searches.
- Integrated advanced data visualization dashboards to improve decision-making.
- Conducted unit and integration testing to ensure system quality and reliability.
- Followed Agile methodology with rapid iterations and continuous improvement.
- Used GitLab for version control and CI/CD pipelines.
- Applied security best practices to protect sensitive data.
- Future plan: make the platform cross-platform (web and mobile).

HPS

Casablanca

Intern – API Developer & Security

Jul. 2024 – Sep. 2024

- Designed and implemented a secure RESTful API for a bank card management system.
- Integrated hybrid encryption (RSA + AES) to ensure data confidentiality.
- Conducted penetration and load testing with Postman and JMeter.
- Worked with SQL Server and Oracle databases for transaction processing.
- Collaborated with senior security engineers to align the system with PCI-DSS standards.

Sozapa

Beni Mellal

Intern – Developer, Stock Management System Project

Jul. 2023 – Sep. 2023

- Developed a local stock management application with supplier tracking and entry/exit logs (PHP).
- Designed a MySQL database schema with optimized queries for reporting.
- Created a user-friendly interface in HTML, CSS, and JavaScript.
- Implemented real-time stock updates and automated low-stock alerts.

Projects

Smart Coffee Ordering Platform: Developed a web platform for coffee ordering with real-time customization

(Spring Boot, MySQL, Bootstrap, JS).

Bus Management Digitalization: Built a digital system to manage bus lines, stops, and routes with Mapbox, REST APIs, and MySQL.

BiblioManager: Designed and developed a library management system in Java (CRUD operations, MySQL, search and filters).

FoodCall: Developed a C/C++ desktop interface for meal ordering with real-time browsing.

GameToolkit: Created a C/C++ toolkit to help students build and test games (reusable libraries for rendering, input handling, and physics).

Certifications

- React Fundamentals – Coursera
- Software Engineering: Design & Project Management – Coursera
- Structured Query Language (SQL) – Coursera
- Oracle Cloud Infrastructure 2024 Certified Foundations
- Introduction to Java & Object-Oriented Programming – Coursera

Skills

Programming Languages: Java, C++, C#, Python, PL/SQL

Web Development: Spring Boot, Spring Security, JEE, ASP.NET, HTML, CSS, JavaScript

Databases: MySQL, MongoDB, SQL Server, Oracle, Firebase

DevOps & Tools: Docker, Git, GitHub, GitLab

Data Science: Scikit-learn, TensorFlow, Keras, PyTorch, Pandas

Testing & APIs: Postman, JMeter

Languages

French: Fluent

English: Intermediate

Arabic: Native
