PROFESSIONAL SUMMARY

Final-year Engineering student in Computer Science and Networks (MIAGE option), passionate about full-stack development and DevOps. Experience in building secure RESTful APIs, cloud integration, and data-driven applications. Strong interest in cloud computing and DevOps practices. Seeking a PFE internship in software development or DevOps to apply technical expertise and contribute to impactful projects.

EDUCATION

École Marocaine des Sciences de l'Ingénieur (EMSI) | Casablanca, Morocco
Diplôme d'Ingénieur d'État – Computer Science & Networks, MIAGE option | 2023 – Présent

École Marocaine des Sciences de l'Ingénieur (EMSI) | Casablanca, Morocco
Classe préparatoire | 2021 – 2023

Université de Beni Mellal | Beni Mellal, Morocco
Licence en Économie et Gestion | 2020 – 2021

PROFESSIONAL EXPERIENCE

LumiaTechnologie | Paris, France | Jul 2025 – Sep 2025
Intern – Full-stack Developer (CraftReportIA Project)

- Design and development of **CraftReportIA**, an intelligent platform for automated structured report generation.
- Development of the front-end with **Next.js**, providing a modern, responsive, and high-performance interface.
- Implementation of a **Docker-containerized** microservices architecture with **Spring Boot** to ensure scalability, modularity, and maintainability.
- Development of secure **RESTful APIs** to handle report requests efficiently.
- Deployment of a **Python microservice** containerized with Docker, integrating the **LLaMA 3** model for intelligent processing and generation of report content.
- Data management using **Elasticsearch** for fast and efficient searches.
- Integration of **advanced data visualization dashboards** to enhance decision-making.
- Conducted **unit and integration testing** to ensure code quality and system reliability.

- Followed an **Agile methodology**, with planning, rapid iterations, and continuous project improvement.
- Utilized **GitLab** for version control and **CI/CD pipelines** to automate deployments and monitor system performance.
- Applied **security best practices** to protect sensitive data and ensure the robustness of the solution.
- **Future plan**: make the platform **cross-platform** for web and mobile to maximize accessibility and user experience.

HPS | Casablanca, Morocco | Jul 2024 – Sep 2024

Intern – API Developer & Systems Security

- Designed and implemented a secure RESTful API for bank card management system.
- Integrated hybrid encryption (RSA + AES) to ensure data confidentiality.
- Performed penetration testing and API load testing with Postman and JMeter.
- Worked with SQL Server and Oracle databases for transaction handling.
- Collaborated with senior security engineers to align system with PCI-DSS standards.

Sozapa | Beni Mellal, Morocco | Jul 2023 – Sep 2023

Intern – Developer (Stock Management System)

- Développement d'une application locale de gestion de stock avec suivi des fournisseurs et journal des entrées/sorties en PHP.
- Conception du schéma de base de données MySQL avec des requêtes optimisées pour le reporting.
- Création d'une interface conviviale pour les opérateurs d'entrepôt en HTML, CSS et JavaScript.
- Mise en place de mises à jour de stock en temps réel et alertes automatiques pour les stocks faibles.

PROJECTS

Smart Coffee Ordering Platform

- Developed a web platform for online coffee ordering with real-time customization.
- Implemented a backend with Spring Boot and a MySQL database to manage orders and client preferences.
- Integrated real-time notifications for order tracking.
- Built a modern and responsive frontend with Bootstrap and JavaScript.

Bus Management Digitalization

- Created a digital system to manage bus lines, stops, and routes.
- Integrated Mapbox for interactive route visualization.
- Developed RESTful APIs to manage communication between front-end and back-end.
- Designed and optimized MySQL schema to store route and schedule data.
- Improved accessibility for city transport planning.

BiblioManager

- Designed and developed a library management system in Java.
- Implemented CRUD operations for books, members, and loans.
- Integrated MySQL for persistent data storage.
- Provided search and filter functionalities for improved usability.

FoodCall

- Developed a desktop interface in C/C++ for meal ordering.
- Enabled real-time menu browsing and order placement.
- Designed modular code structure to facilitate future enhancements.

GameToolKit

- Created a toolkit in C/C++ to help students build and test games.
- Provided reusable libraries for rendering, input handling, and physics simulation.
- Documented and tested modules to ensure ease of use.

CERTIFICATIONS

- React Fundamentals – Coursera
- Software Engineering: Design & Project Management – Coursera
- Structured Query Language (SQL) – Coursera
- Oracle Cloud Infrastructure 2024 Certified Foundations
- Introduction to Java & Object-Oriented Programming – Coursera

SKILLS

Programming Languages: Java, C++, C#, Python, PL/SQL

Web Development: Spring Boot, Spring Security, JEE, ASP.NET, HTML, CSS, JavaScript

Databases: MySQL, MongoDB, SQL Server, Oracle, Firebase

DevOps & Tools: Docker, Git, GitHub, GitLab

Data Science: Scikit-learn, TensorFlow, Keras, PyTorch, Pandas

Testing & APIs: Postman, JMeter

LANGUAGES

French: Fluent || English: Intermediate || Arabic: Native
